OP5: six 9 x 9 slices of one approximate field

Centre (t,x,y,z) = (1, 0.6, 0, 0); axis offsets +/-0.01; saved coefficients, no refitting.

	Equation residual	Inverse metric g00	Mixed metric component	Lorentzian area magnitude
t-x					0.001657 to 0.03066 horizontal: t; vertical: x	-0.5829 to -0.4752 horizontal: t; vertical: x	-1.119 to -1.091 horizontal: t; vertical: x	1.7 to 1.951 horizontal: t; vertical: x
t-y					0.001657 to 0.03655 horizontal: t; vertical: y	-0.5555 to -0.4924 horizontal: t; vertical: y	-0.03031 to 0.01868 horizontal: t; vertical: y	9.675 to 9.976 horizontal: t; vertical: y
t-z				
	0.001657 to 0.03668 horizontal: t; vertical: z	-0.5598 to -0.4943 horizontal: t; vertical: z	0.25 to 0.2659 horizontal: t; vertical: z	2.114 to 2.147 horizontal: t; vertical: z
x-y					0.001657 to 0.03215 horizontal: x; vertical: y	-0.5891 to -0.4661 horizontal: x; vertical: y	0.3575 to 0.375 horizontal: x; vertical: y	7.5 to 7.74 horizontal: x; vertical: y
x-z				
	0.001657 to 0.03354 horizontal: x; vertical: z	-0.5931 to -0.4673 horizontal: x; vertical: z	-0.1315 to -0.08868 horizontal: x; vertical: z	1.816 to 1.837 horizontal: x; vertical: z
y-z					0.001657 to 0.03868 horizontal: y; vertical: z	-0.5669 to -0.4862 horizontal: y; vertical: z	0.1045 to 0.1186 horizontal: y; vertical: z	4.553 to 4.664 horizontal: y; vertical: z
	Shared colour range: 0.001657 to 0.03868	Shared colour range: -0.5931 to -0.4661	Shared colour range: -1.119 to 0.375	Shared colour range: 1.7 to 9.976

Area includes time-space bivector components; spatial cross products alone are insufficient.

All sampled coframes are invertible and g00 < 0. Residuals are nonzero; no exact solution is claimed.
